MAILI

Explore MaiLi's Portfolio

Experience MaiLi's portfolio of four advanced HA fillers, designed to enable leading physicians to craft your vision with luxurious precision. Used to complement one another, each filler has its own unique benefits for the art of creation – enhancing and harmonising for total rejuvenation and beautification.

With varying concentration and structure, each formula promises exceptionally soft and supple elasticity to lift, plump and smooth away the signs of ageing in specific areas of the face, while offering superior shaping and sculpting potential to achieve your perfect look.

MaiLi's Patented Science

MaiLi was crafted in Switzerland using the most advanced technology to design a new, patented formula that employs Smart Spring Science. By employing an innovative transformational process that uses long chains of hyaluronic acid (HA), MaiLi created a luxuriously soft and supple gel with springlike elasticity. A bouncy filler promising authentic volume, projection power and longevity – for smoothing, sculpting and shaping timeless results.

Precise

Treatments with Precise:

- Define & enhance lips
- Smooth away fine lines & wrinkles
- Treat under-eye bags and dark circles with tear trough filling*
- Facial reconstruction of structural defects: scar tissue treatment

* MaiLi Precise is reserved to specialists specifically trained in the injection technique and who have sound knowledge of the anatomy and physiology of this periorbital area.

Define

Treatments with Define:

- Define, shape & contour lips
- Fill & smooth deep depressions
- Fill nasolabial folds or 'smile lines'
- Smooth marionette lines
- Facial reconstruction of structural defects: scar tissue treatment

Volume

Treatments with Volume:

- Fill & smooth deep depressions
- Add volume to cheeks and temples
- Contour facial features
- Facial reconstruction of structural defects: volume lost by HIV associated lipoatrophy

Extreme

Treatments with Extreme:

- Sculpt and reshape face
- Enhance cheeks, chin and jawline
- Profile balancing
- Facial reconstruction of structural defects: volume lost by HIV associated lipoatrophy

Achieve More from Less Filler

Thanks to the volumising capacity of the filler, less product can be used for a more authentic look and feel.*

Soft & Natural Expression

Experience youthful rejuvenation with a soft and supple, springlike gel, designed to follow natural movement and expression.

Long-lasting Results

MaiLi promises exceptional volume, elasticity and longevity across the entire range – 12 months, including treatment in the lips, saving time between top-ups.**

Superior Comfort

MaiLi's entire portfolio is fused with pain-reducing lidocaine for a more comfortable experience.

* Clinical investigation 17E1176: in comparison to Juvéderm® Voluma, 24% less product of MaiLi Extreme was injected for the same results in the treatment of the cheek area. ** Data on file.
